"KEY MAN" SINCE 1921, IS ELLIOTT'S RECORD

By Walter M. Simpson

In every large organization there is one "key man" who is the axis about which the whole organization revolves. During the past fifteen years the hub of the wheel of business activities of Phi Rho Sigma has been the able mind and hands of Ralph W. Elliott. During the past decade and a half Ralph Elliott has been the stabilizing and energizing influence in the growth and development of Phi Rho Sigma.

The names of Milbank Johnson, Alfred C. Cotton, Wylles Andrews, Dave Wenstrand, Victor Keene, Joseph McFarland, Clifford Grulee, and Bill Joyce, and many others, will always be associated with the building of Phi Rho Sigma on a firm and substantial foundation. After the hectic days of the World War, Stuart Wilson came forward with a definite program of internal growth and development, which changed the character of Phi Rho Sigma from a social fraternity in medical schools to a truly professional fraternity. Since the presidency of Stuart Wilson, membership in Phi Rho Sigma has become more and more concerned with the ethical and cultural preparation of a selected group of medical students for the practice of medicine. In more recent years, Irving Cutter and E. P. Lyon, leaders in medical education, have carried these ideals to their present high plane.

"Internship" Preceded His Election

The Wilson program was adopted at the Omaha convention in 1921. It was at this convention that Ralph Elliott was elected secretary-treasurer of Phi Rho Sigma. Ralph had already served a long "internship" in preparation for this important office. He was one of the founders and charter members of Kappa Chapter at Western Reserve University. He carried a large share of the burden of arranging for the details of the 1919 convention, and at that convention he was elected a councilor of the Western District.

When the Central Office was established at Cleveland some ten years ago, Ralph's first move was to gather together the many details of the organization into a single workable unit, guided by the watchword "Service." This work was greatly facilitated by the installation of an addressograph. The stencils served as a geographic directory of the Fraternity, making it possible to address the envelopes for the *Journal of Phi Rho Sigma* in hours instead of days. In the beginning there were only 4,200 names in the directory; now there are more than 12,500 in this living file. As a practical unit in the service activities of the Central Office, the geographic file is invaluable. A list of members in a state or city can be furnished in a few minutes, designating not only names and addresses but also chapter memberships. Often several hundred mimeographed letters are prepared and mailed in a single day, covering such activities as state meetings, A.M.A. reunions, and questionnaires for information on prospective members.

Dr. Ralph W. Elliott
"——hub of the wheel"

The master file was installed in the Central Office eight years ago. Since then duplicates and cabinets have been installed by two chapters and others are in progress of installation. Duplicate record cards are furnished these chapters and ultimately most of our chapters will have such invaluable records. This file is one of the most complete, if not the most complete, of any fraternity.

As a result of these service accessories, the Fraternity is able to furnish quick and accurate information on members in specialties, faculty members, location of interns and resident physicians, detailed activities of members, and many other items of interest. Many requests are received for Phi Rhos in distant cities to whom patients may be referred, for faculty contacts for postgraduate studies and for information regarding the desirability of locating in certain communities.

Each autumn "Service Leaflets" are sent to all seniors regarding internships, and each spring leaflets on "Choosing a Location," accompanied by hospital questionnaires, are sent to all interns and resident physicians. Instead of a general service in locating internships, which has always been unsatisfactory, the Central

(*Continued on page 2*)

CRAMP ENDS 29-YEAR WAR ON NOSTRUMS

Veteran of 29 years of continuous service in the war against medical frauds, Dr. Arthur J. Cramp, Omicron '06, in December, 1935 resigned his post as director of the Bureau of Investigation of the American Medical Association.

While attending the Cleveland meeting of the Association in June, 1934, Dr. Cramp suffered a coronary thrombosis which kept him in bed for nearly six weeks. He returned to his duties after a four-months' rest only to discover that he was no longer able to carry the burden. Since his resignation he has been "loafing" in Fort Lauderdale, Florida, and now is planning to prepare for publication the third volume of his book, "Nostrums and Quackery."

The significance of Dr. Cramp's well-known, labors is suggested by a statement in the *Journal of the Indiana State Medical Association* for January, 1936: "In the past fifteen or twenty years, every major quack or medicine man who has been exposed probably owes his downfall to Dr. Cramp." Imbued with the idea that his work is primarily for the protection of the public and that the benefits to the medical profession are of secondary importance, he has been, the *Journal* says, "fearless in his denunciation of fraudulent practice and, on occasion, has had to proceed against personal friends."

Legal Attacks on Bureau Fail

"As might be expected," the *Journal* continues, "a department such as Dr. Cramp has developed comes in for criticism from various sources; it has been openly attacked by some of the proprietary medicine interests of the country. The non-medical chalatans and mountebanks, finding their paths obstructed, have moved heaven and earth in their attempts to forestall the activities of this man, and some of them have gone to such lengths as filing suits against the A.M.A. Cases filed have been innumerable, yet only two have come to trial, the now-famous Wine of Cardui suit, and the suit of Norman Baker of 'cancer cure' fame. In the former case, a judgment in the sum of one cent was given the plaintiff, instead of the sum of $300,000 which had been demanded! It is said that the one cent would not have been awarded except for the improper placing of a preposition in one of the articles attacking the company. In the case of Norman Baker, the suit was entirely unsuccessful."

Born in London, England, in 1872, Dr. Cramp worked for a short time as office boy in a London steamship office and then, apparently succumbing to the lure of the sea, came to the United States at the age of 19. After "experimenting" with middle

Vol. XXXII April, 1936 No. 4

THIS journal is published by the Fraternity with the hope that it will be read by every living member and in an attempt to interpret the life of the medical student and the work of the Fraternity to the individual alumnus.

THE EDITOR APPEALS

On May 11, 1932, Phi Rho Sigma Fraternity in general and Zeta chapter, of the University of Michigan, in particular suffered a crushing blow when Dr. Roy Bishop Canfield, Zeta '99, who was for many years the "father" and moving spirit of the Michigan chapter, perished in an automobile accident.

One year later, the present editor of the JOURNAL inaugurated a campaign the objective of which was the establishment of a memorial to Dr. Canfield in the form of a lectureship to be presented to the University of Michigan—his alma mater. The appeal for funds was limited to Zeta alumni.

As this number of the JOURNAL goes to press, the Canfield memorial drive is $600 short of its 1000-dollar goal, and the Editor, faced with the necessity of asking outside aid to make up the deficit—which would mean the removal of the Fraternity's name from the title of the lectureship fund, is renewing his request for cooperation through the medium of the JOURNAL. The original request was for a minimum of $5.00 from each Zeta alumnus and $50.00 from each member of the small group known as "Canfield's men"—outstanding otolaryngologists trained by Canfield, "the perfect teacher."

The list of those who have contributed to date is printed elsewhere in the JOURNAL, together with the letter of submission to the regents of the University. The letter was designed by Shirley W. Smith, vice-president and secretary of the University, to express the Fraternity's wishes in the event that it becomes the donor of the entire fund—and thereby entitled to mention in the name of the lectureship—and to guide those who, in the future, may be charged with its administration. The income of the fund is to be used to bring to Ann Arbor, once each year, some distinguished speaker in the field of medicine to address the student body of the University School of medicine.

In an appreciation written for the Canfield number of the JOURNAL (December, 1932), Alexander Grant Ruthven, president of the University of Michigan, said: "Roy Bishop Canfield was a powerful factor for good in the University of Michigan. His energy, devotedness to his profession, insistence upon individual and professional progression, and meticulous care in the instruction of students, not only resulted in his own growth, in the advancement of his chosen fields of study, and in the production of good men, but also proved to be stimulating factors for other departments.

"He has a permanent place in that galaxy of great and earnest souls whose lives have set a standard which must always hold at a high level the institution which they loved and served so well."

NEW LIGHT ON AN OLD TOPIC

The following paragraphs from the address, "Swans Sing Before They Die," delivered by Dr. Elias P. Lyon, grand president of Phi Rho Sigma, at the meeting of the Council on Medical Education in Chicago on February 18, 1936, need no further comment. They are of themselves we believe, stimulating and provocative of thought. (The title of Dr. Lyon's talk is in analogical anticipation of his retirement from the deanship of the University of Minnesota school of medicine on June 30 1936. It was inspired by the verse,

"Swans sing before they die,
'Twere no bad thing
Did certain persons die
Before they sing."

The extract reads:

"While conditions within the factory thus demand wisest consideration one may wonder as to the effect of environmental factors. What is happening to our material outside college walls? One of the young psychologists of our committee, who happens himself to be a sophomore medical student, raised the question of medical fraternities. The average scholarship of fraternity members is an old subject often played with without much result by college deans. But our man raised the question in a new way: How is the performance of these groups in medical school in comparison with what it *ought to be* on the basis of premedical grades? Out of this comes the conclusion, attested as probably significant by our investigators, that some fraternities do better and some worse than would have been expected. I think this is a brand new finding.

"It is a disquieting thought that we may have organizations among our students which actually have the effect of lowering the potential performance of their members. Perhaps this is a field of extra curricular activity for faculty members. Anyway it is good food for thought and a stimulus to further work."

A FALLACY UNCOVERED

In an attempt to supply an answer to the question, "Are fraternity costs too high?" and to "debunk" the ever-recurring assertions that they are, Harold Jacobsen, secretary-treasurer of the Fraternity Secretaries Association and executive secretary of Sigma Pi fraternity, has written in the March, 1936 number of *The Fraternity Month* a lengthy and detailed analysis of initiation fees, dues, and other costs, basing his statements on statistics compiled by the Fraternity Secretaries Association and presented at the annual meeting in New York on November 27, 1935.

It is fallacious, Mr. Jacobsen holds, to say flatly that "fraternity costs *are* too high"; that "the average undergraduate *can't* afford to belong to a fraternity"; or that "the national organizations are taking entirely *too much money* from a college campus," for in each case, he says, "the answer depends entirely upon the individual, because an article, service, or club membership may be considered high or low depending upon the circumstances of the individual."

Rushee Should Investigate Costs

"Usually," Mr. Jacobsen continues, "that which a person can afford is not looked upon as costing too much. No college student is obligated to join a fraternity. He does so of his own free will. Therefore, he should know before joining whether or not he can afford the cost of fraternity membership. Most fraternities advise their rushees specifically about initiation fees, monthly charges for room, board, and dues, as well as payments which may have to be made as either an undergraduate or an alumnus to the national organization. A college fraternity is not operated for profit but is a cooperative society in which the member may enjoy specific privileges and be given certain opportunities which he might not otherwise have. Being a cooperative organization, there is no secret about the cost of membership, and that boy who joins a fraternity without first learning about the cost, does not only himself an injustice but also his fraternity brothers. Membership in a fraternity is not the luxury which some would like us to believe. There are campuses on which a man may live in a fraternity house and enjoy all its social and other privileges at a cost no greater than in a comfortable rooming house or dormitory. Many times, however, it does cost a little more to live in a fraternity house and because of this the fraternities make an effort to pledge and initiate only those men who can afford the slight additional expense."

High Fee Not Necessarily Exorbitant

If one fraternity charges an initiation fee of $100 and another fraternity on the same college campus charges only $25, there is no logical reason for saying, Mr.

R. Bishop Canfield,
—in his memory we submit—

The Letter of Submission

Ann Arbor, Michigan

To the Regents of the
University of Michigan:

The medical fraternity of Phi Rho Sigma, of which the late Dr. Roy Bishop Canfield was a member, desires to establish a memorial to him in the form of a lectureship in the University of Michigan, his alma mater, as a member of whose faculty practically all his professional life was spent.

We herewith enclose the sum of $400 to which we expect to add other donations from time to time. We desire to have this as the nucleus of the Dr. Roy Bishop Canfield Memorial Lectureship Fund. We would like to have this initial gift and any later gifts, invested and reinvested, with accumulations of income to be a part of the principal until the total reaches such a sum that the annual income from it in the opinion of the Medical Faculty and of the President and Regents reaches such a sum as shall be an appropriate honorarium to the person or persons chosen to give the Dr. Roy Bishop Canfield Memorial lecture or lectures for the then current year.

If it is found feasible to obtain a distinguished lecturer for an honorarium equal to his traveling expenses the lecture may be arranged on that basis. If any sum remains during any year after the payment of honorarium or expenses of the lecturer, such sum shall be added to the principal of the fund. Any sum once placed in the endowment shall so remain thereafter.

Respectfully submitted,

ALUMNI NEWS

Dr. William T. Leach, Rho, was elected surgeon-in-chief of the Locust Mountain Hospital, Shenandoah, Pennsylvania, on February 11, 1936.

Dr. Samuel R. Skillern, Jr., Lambda Phi, associate professor of rhinolaryngology in the Graduate School of the University of Pennsylvania, while hunting in Virginia received a puncture wound in his left hand from the boken leg bone of a rabbit, and has been confined to bed with tularemia since December 1, 1935.

Dr. Gordon Watson, Theta Tau, and Mrs. Watson are on a European tour during which they will visit several medical centers and spend considerable time in Vjenna. They are making the trip in their automobile.

Dr. Vergil Heber Sergeant, Omega, of Isleta, Ohio, is a candidate for election as representative in Congress from the seventeenth Ohio district. He will run on the Republican ticket in the primary election to be held May 12. A veteran of the World War who saw active service in France, Dr. Sergeant is campaigning with the slogan, "No more wars—we've had enough!" and is advocating "adequate old age pensions for the needy, social justice for all, and no retail sales tax on necessities."

Dr. Leonard G. Redding, of Scranton, Pennsylvania, is the author of a paper on "Phlyctenular Disease and Vitamin Deficiency" read before the section of eye, ear, nose, and throat diseases of the Medical Society of the State of Pennsylvania at Harrisburg, October 1, 1935, and printed in *The Pennsylvania Medical Journal* for December, 1935.

Dr. Wirt A. Warren, Alpha Delta, has announced the opening of an office at Suite 410, Schweiter Building, Wichita, Kansas. His practice is in internal medicine.

The following members, listed as "lost" in the February number of the JOURNAL, are located at the addresses given: Frank Lynch, Lambda Phi, County Road, El Paso, Texas; Henry Pate, Chi Zeta, Carlsbad, New Mexico; and Henry Brown, Alpha, Dexter, New Mexico.

The 15 men pledged by Delta chapter of the University of Southern California, last fall were initiated into active membership at the combined initiation and annual spring banquet held on April 3, 1936, at the University Club, Los Angeles, under the sponsorship of the Southern California alumni chapter. Harry F. Mershon, secretary-treasurer, was in charge of arrangements.

The alumni chapter is making plans for a Phi Rho luncheon to be held during the 1936 meeting of the California State Medical Association in Coronado. A similar luncheon at the Pasadena meeting in 1935 attracted 125 members of the Phi Rho Sigma. Notice of the 1936 luncheon will be published in the *California and Western Journal.*

CHAPTER ETERNAL

Dr. Francis G. Jones, one time national president of Chi Zeta Chi medical fraternity, which merged with Phi Rho Sigma in 1928, died in Atlanta, Georgia, on March 2, 1936, of complications following an appendectomy. A distinguished Atlanta dermatologist, Dr. Jones was a grandson, on his paternal side, of Major Andrew Maybank Jones, of the Confederate army in the Civil war, and, on his maternal side, of Judge James M. Baker, senator in the Confederate congress.

After receiving his bachelor of arts degree from Washington and Lee University, where he was president of Phi Kappa Sigma, Dr. Jones studied medicine at the Atlanta Medical College, now a part of Emory University, and was awarded an M. D. in 1910. He served his internship at Grady Hospital, Atlanta, and was in general practice for several years before specializing in dermatology. He was an active member of the Fulton County (Ga.) Medical Society.

Dr. Calhoun McDougal, vice-president of Phi Rho Sigma, was a pallbearer at the funeral, and other members of the Fraternity formed an honorary escort.

Dr. Harris E. Santee, Beta '92, died on February 28, 1936. He was a resident of High Lake, Illinois.

Dr. Frederick W. Van Valkenburg, Theta Tau '25, of Long Prairie, Minnesota, was instantly killed on February 8, 1936. when a truck collided with the car in which he was riding with his wife, who was slightly injured.

Born in Long Prairie on February 21, 1898, Dr. Van Valkenburg began the study of medicine at the University of Minnesota soon after graduation from high school, but interrupted his studies to serve overseas with the 812th Aero Squadron during the World War. His enlistment over, he returned to Minnesota to receive his M. D. in 1925, after which he interned at the Charles T. Miller Hospital and the Ancker Hospital in St. Paul. He then became associated with his father in the practice of medicine and surgery at Long Prairie.

In 1927, Dr. Van Valkenburg did postgraduate work in surgery at the Cook County Hospital in Chicago, where he was married, and in 1933 held a fellowship in surgery at the University of Pennsylvania. A year later he became resident urological surgeon at the Newark City Hospital, Newark, New Jersey. Upon completing his residency there, he returned to practice in Long Prairie, only to meet accidental death eight months later.

Dr. Van Valkenberg held memberships in the Todd County (Minn.) Medical Society, the Upper Mississippi Medical Society (secretary in 1933), and the Minnesota state and American Medical associations.

Dr. Charles Swenson, Theta Tau '03, pioneer physician of Braham, Minnesota, died on June 22, 1935, after having been in poor health since 1926, when he underwent a mastoid operation.

Born near Orebro, Sweden, in 1876, Dr. Swenson came to the United States in 1880 and settled with his parents near Rush City, Minnesota, where he received his elementary education. In 1903 he graduated from Hamline University in St. Paul, Minnesota with the degree of doctor of medicine, and began to practice in Braham where, in the same year, he established the Braham Hospital. He remained in practice in Braham until his death at the age of 58.

Dr. Swenson was a member of the Minnesota State and Eastern Minnesota Medical associations, as well as of the American Medical Association. For 18 years before his death he was surgeon for the Great Northern Railway Company.

Dr. John Andrew Devine, Mu, died on December 10, 1935, of coronary thrombosis following the amputation of a leg. He graduated from the medical school of the University of Iowa in 1908 and practiced in Bancroft, Iowa for 25 years. He leaves a wife and seven children.

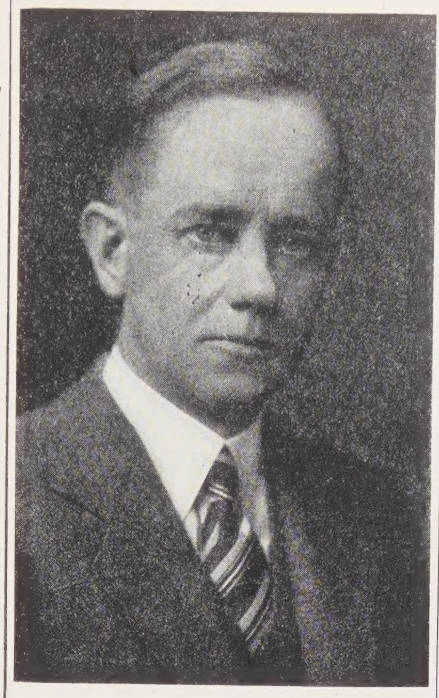
Attend Phi Rho luncheon Kansas City session A.M.A.



R. Bishop Canfield,
—in his memory we submit—

The Letter of Submission

Ann Arbor, Michigan

To the Regents of the
University of Michigan:

The medical fraternity of Phi Rho Sigma, of which the late Dr. Roy Bishop Canfield was a member, desires to establish a memorial to him in the form of a lectureship in the University of Michigan, his alma mater, as a member of whose faculty practically all his professional life was spent.

We herewith enclose the sum of $400 to which we expect to add other donations from time to time. We desire to have this as the nucleus of the Dr. Roy Bishop Canfield Memorial Lectureship Fund. We would like to have this initial gift and any later gifts, invested and reinvested, with accumulations of income to be a part of the principal until the total reaches such a sum that the annual income from it in the opinion of the Medical Faculty and of the President and Regents reaches such a sum as shall be an appropriate honorarium to the person or persons chosen to give the Dr. Roy Bishop Canfield Memorial lecture or lectures for the then current year.

If it is found feasible to obtain a distinguished lecturer for an honorarium equal to his traveling expenses the lecture may be arranged on that basis. If any sum remains during any year after the payment of honorarium or expenses of the lecturer, such sum shall be added to the principal of the fund. Any sum once placed in the endowment shall so remain thereafter.

Respectfully submitted,
